Line-Stripping Solutions

Introducing

## The New **GX2B-HRA** Mobile Defueling Pump Solution

Streamline defueling, product transfer and line-stripping in military airfield operations with the new GX2B-HRA Mobile Defueling Pump from Blackmer®.

Building on more than 70 years of serving the United States military, Blackmer has designed this positive-displacement sliding-vane pump, which is mounted on a towable trailer complete with standard pintle hitch, with a wide variety of benefits, including:

- **Hatz 7-hp diesel-engine operation with Jet-A, JP-5, JP-8, diesel and kerosene fuels**
- **Standard quick disconnect with other fitting options available**
- **Electric start with pull-cord backup**
- **Self-priming without need for initial wet prime**

- **Multi-service usage**
- **Road and tarmac portability**
- **Flow rates to 70 gpm**
- **Also suitable for commercial applications**

For mission-critical solutions from the proven experts in mobile pumping technology, military airbase personnel share a common demand...
